SUMMARY

Final-year CS (Data Science) undergraduate Passionate about building full-stack applications integrating backend engineering and machine learning, from schema design through Dockerized deployment. Built four end-to-end software projects across fintech analytics, AI recruitment, networking, and web development

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Rust, R

Frontend: React, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma

Backend: Node.js, Express.js, FastAPI

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM

Cloud & DevOps: AWS (RDS, S3), Docker, Git/GitHub, CI/CD

ML/Data: Random Forest, FinBERT (sentiment analysis), Pandas, scikit-learn

PROJECTS

Kayos Analytics — AI-Powered Indian Equity Market Intelligence Platform | *Next.js, FastAPI, PostgreSQL, Docker*

- Built a full-stack ML platform combining a Random Forest model with FinBERT news-sentiment analysis to generate real-time NSE/BSE equity insights.
- Engineered and containerized the application as a solo developer using Docker for reproducible local development and deployment (Prisma + PostgreSQL/NeonDB, Clerk auth, Git LFS for a ~178MB model artifact) with CI-ready deployment docs.

DPI Engine — Deep Packet Inspection System | *C++17, Multi-threading, Networking*

- Built a high performance C++17 engine parsing PCAP network files (Ethernet/IP/TCP) and extracts TLS SNI to classify encrypted HTTPS traffic without decryption.
- Designed a multi-threaded producer-consumer pipeline featuring five-tuple flow tracking to enable real time stateful, rule-based traffic blocking.

CareerForge AI — AI Resume & Career SaaS Platform | *Node.js, Express, Claude API, Docker, Nginx*

- Developed a Node.js/Express SaaS leveraging the Claude API for automated ATS resume scoring, cover letter generation, and LinkedIn content planning.
- Deployed Containerized microservice via Docker, Nginx, and Render with rate limiting, security headers, and health-check monitoring.

Anoop Srivastava | Legal Advisor — Production Client Website | *HTML, CSS, Capacitor*

- Designed, built, and deployed a live business website for a practicing tax attorney, generating real client leads in production; packaged a Capacitor-based Android build with Play Store publishing documentation.

EXPERIENCE

Web Development Intern | SUS Infotech | *Sept 2025 – Dec 2025*

- Shipped responsive HTML/CSS/JS interfaces integrated with a Node.js + MySQL backend on live client projects, ensuring consistent behavior across devices.
- Collaborated within a Git/GitHub team branching workflow, resolving UI/UX and backend bugs pre-production.

EDUCATION

B.Tech, Computer Science (Data Science) — KCC Institute of Technology and Management, Greater Noida (*Expected 2027*)

Intermediate (12th), Doon International School, UP — 72% (2023) | High School (10th), The Indian Academy, UP — 82% (2021)

CERTIFICATIONS & AWARDS

Data Structures & Algorithms with C++ (Striver's A2Z + NeetCode 150, 150+ problems) | Intro to Web Development (Coursera) | IEEE Workshop Participant, IEC 2025
